IT Delivery & BAU Operations Knowledge Base

Welcome to IT Delivery & BAU Operations

This knowledge base provides centralized documentation for the IT Delivery & BAU Operations Tracker project.

The project simulates technology delivery and business-as-usual (BAU) operations within an enterprise IT environment.

Project Objectives

- Track IT operational activities using Jira.
- Monitor incidents, blockers, and overdue tasks.
- Maintain clear and structured operational documentation.
- Support weekly status reporting and stakeholder communication.
- Demonstrate Agile, DevOps, and IT governance fundamentals.

Documentation Directory

1. **How We Work — Operations Playbook**
2. **Daily BAU Operations Checklist**
3. **Incident Response & Escalation Runbook**
4. **Weekly IT Operations Status Report**

Tools

- Jira — Work item tracking and dashboards
- Confluence — Documentation and knowledge management
- Microsoft Excel — Operational tracking and reporting

This project uses simulated data for educational and portfolio purposes. It does not represent actual banking operations.
